## OBJECTIVE

To be part of a reputed organisation that offers me the opportunities to explore my skills and to make a positive contribution towards the growth of the organisation and self.

## PROFILE

- A result oriented and self motivated Software Engineer with 2 years 10 months of experience in Banking and Finance domain in **Java**
- Hands on experience in developing software for ATM, Teller and Web applications
- Comprehensive experience in analysis, design, testing and implementation of business systems and in peer code reviewing
- Involved in different modules like client onboarding, tax calculation, account registry, ATM services, transaction processing system, technology upgrades, localization and project migration
- Hands on Experience in **Core JAVA**.
- Basic Knowledge of **Apache Maven, Git, JEE, JMS, Hibernate, Web Services, Apache Camel**.

## ORGANISATIONAL DETAILS

**Misys Software Solutions, Bangalore**

**April 2016 – till date**

**Project: German SaaS**

This project is focused on enhancing and integrating the existing Core Banking System for German market. The functionalities include client on boarding, tax calculation and synchronizing accounts with central registry by integrating with the third party APIs.

### **Roles and Responsibilities:**

- Actively interacting with product management and third parties to analyse the requirements.
- Bringing in the best possible solution by developing applications in JAVA or other selected platforms to meet the requirements.
- Creating frameworks using apache camel to be used by other applications.
- Active participation in analysing and bringing in technologies for development.
- Identifying defects, working on it and bringing it to closure.
- Helping project fresher by providing basic java functionalities and project introductory sessions
- Active participation in code walkthroughs and quality reviews.

### **Notable Deliverables**

- Created a third party API integration framework.
- Client on boarding functionality by integrating with Naqoda.
- Integrated Tax calculation functionality provided by Naqoda (Tax Engine).
- Integrated Register Account functionality provided by Bank Verlag (Account Registry).
- Working on Localization framework.

**Project: Ganart ATM solutions**

This project is based on ATM and related services that could be implemented to enhance the functionality which include mobile top up, bill payment and money transfer. The product includes front-end system for user interaction, online transaction processing and other systems to support the services. The services can be accessed from kiosks, desktop and handheld devices.

**Roles and Responsibilities:**

- Analysing functional requirements provided by senior management and suggesting best suitable solutions for the same.
- Developing moderately complex software in JAVA, Ruby or other selected platforms for requirements.
- Working on different functional specification, customizations and their impact analysis.
- Create and execute designs for small sets of new functionalities as part of different projects.
- Collaborate and add value through participation in peer code reviews and providing comments.

**Notable Deliverables**

- ACH functionality for ATM solution.
- OTP based functionality for ATM solution.
- Web based mobile solution to cater ATM functionalities on mobile.
- Centralized ATM update agent.
- Client onboarding feature.

**SOFTWARE SKILLS**

- Programming languages – Core JAVA
- Basic knowledge of Maven, Git, JMS, Hibernate
- Operating Systems – Mac OS, Linux
